

Heavy Duty Circuit Cleaner

Heavy Duty Electro Kleene Part # 94052

Heavy Duty Electro Kleene quickly loosens and removes heavy oil, grease, dust, dirt, and other residue from electrical and mechanical assemblies. Designed for high strength, heavy duty cleaning in electronic manufacturing, bench repair, and field service applications. Electro Kleene provides rapid and powerful cleaning of electronic equipment such as industrial controls, motors, computers, printers, and office machines. Will not damage PSB's, components or markings. The non-flammability and excellent dielectric properties of this solvent make it suitable for cleaning some equipment while in operation. Electro Kleene is formulated for solvent resistant components such as connectors, contacts, relays, tuners, servos, switches, solenoids, PCB's, motors, disc drives, capacitors, and similar electronic components. This high strength cleaner is NOT designed for use on polycarbonate, polystyrene, ABS, display panels, or other solvent sensitive materials or coatings.

Benefits

- Evaporates quickly and leaves no residue •
- Non-flammable and non-conductive •
- Contains an environmentally friendly, non-CFC cleaning solvent •
